### GPA (Grade Point Average)

Under each grading system, the GPA is computed by multiplying the grade points of each grade by the session weight of each course. The total GPA of these products is divided by the total session weights of the term. The cumulative average is determined in the same manner as the term average.

### Session Weight

The session weight of a course incorporates a number of components and differs between face-to-face and blended formats. The summation of these components produces a final session weight for a course and will be used to calculate the grade point average.

### Academic Standing

Students must maintain a cumulative GPA of 2.70 per term to be regarded in good academic standing. Academic expulsion is clearly stated on the transcript with no final GPA awarded.

### IE Brown Executive MBA Transcript Key
